# Eaton 9E UPS

### 1kVA/2kVA/3kVA/6kVA/10kVA/15kVA/20kVA

Eaton 9E range

LCD display for clear information on the UPS' status and measurements

#### Advanced protection for:

- Infrastucture
- Industrial and Medical IT
- Networking
- Storage
- Telecom

#### **Essential Online UPS**

#### Reliability and performance

- The Eaton 9E constantly monitors power conditions and regulates voltage and frequency due to the online double conversion topology.
- Power more servers than most similar UPSs due to a 0.8 power factor.
- Trust a leading manufacturer with decades of experience and high quality standards: CE compliance certified by external agency (CB report from the TUV).

#### Manageability

- Get clear information on the UPS' status and measurements (load level, battery level, input/output voltage and frequency) on a single screen with the new LCD interface.
- Easily communicate with the UPS through USB, RS232 serial or over the network with the optional network card (Network-M2). Relay cards or ModBus cards are also available.
- Eaton 9E is compatible with Eaton IPM Editions Software which permits to integrate all major operating systems, leading virtualisation environments and cloud orchestrations tools.

#### **Flexibility**

- The internal bypass allows service continuity in case of an internal fault. A maintenance bypass is also available as standard for easy maintenance of the UPS without powering down critical systems.
- Make your installation more flexible with a combo input (3:1 and 1:1) on the 10kVA, 15kVA, and 20kVA.
- Extend runtime as you like by adding up to 4 external battery modules (EBM). For extra-long runtime, XL models with internal supercharger are also available at 3kVA, 10kVA and 20kVA.

## Eaton 9E UPS

- LCD Interface:
  Clear information on UPS
  status and measurements
- 2 1 USB port + 1 serial port
- 3 Slot for management card

- Input/Ouput connections
- External battery module (EBM) connection
- 6 Casters
